Look is a non-profit exhibition space inside of a custom-designed peephole on a Pest apartment door that – alongside the traditional forms of exhibition making – aims to promote experimental endeavours that take place beyond the confines of established venues.

Open: every day round-the-clock
(it is advised to make previous arrangement by telephone)

Rain is a 24-hour real time video loop that runs non-stop during the time of the exhibition. The original animated painting is especially adapted by Levente Szűcs for his solo show in LOOK.

Levente Szűcs paints genre paintings with imaginary figures, still lifes and landscapes, usually in oil. He animated two of his paintings, one of which – *Rain* – is an urban landscape. This video is the logical sequel of previous works depicting one of Szűcs's most frequent motifs, the cloud.

Despite the apparent simplicity of this animation, watching *Rain* takes us to the grey zone of a fantasy world where only our own imagination sets the boundaries of time and space.

Levente SZÚCS

Lives and works in Budapest. He studied at the Hungarian Academy of Fine Art (MKE), participated in the residency program of the Frans Masereel Centre (FMC), and received an MFA in 2006. He has been exhibiting his works in various cities of Hungary, and in London, Germany and Belgium.
